

Something New from Something Old

At Salvage, we re-claim architectural and structural gems from the past and breathe new life into them. Our vision is to assist our clients and their projects by sourcing amazing pieces from all over the world, and to produce something new from something old.

A great example of this is where we worked with a local builder and joinery expert in Brisbane to produce these beautiful bathroom shelves. Due to our unique recycled French Oak assets, we can produce any size or shape shelving, kitchen bench tops, bars, balustrading and other wonderfully textured features for your project. No job is too large or small.

From three bathroom shelves, to extensive features for an entire residential, commercial

or hospitality project, we can add value, ideas and quality new and recycled products from our international supply sources.

We supply our new and recycled French Oak flooring right around Australia. We only source 100% Europe-manufactured French Oak floor boards, parquetry blocks and panels, across a huge variety of colours, textures, styles and finishes.
